ALPOLIC® 350

A Unique Rigid Substrate for Work Zone Signing

What is ALPOLIC® 350...It is a Hi-Tech

Aluminum Composite Material (ACM) produced by continuously laminating aluminum coil stock to both sides of an extruded thermoplastic core. The resulting composite product is light, exceptionally flat, strong, rigid and suitable for work zone safety. It is an approved substrate by the major reflective sheeting manufacturers.

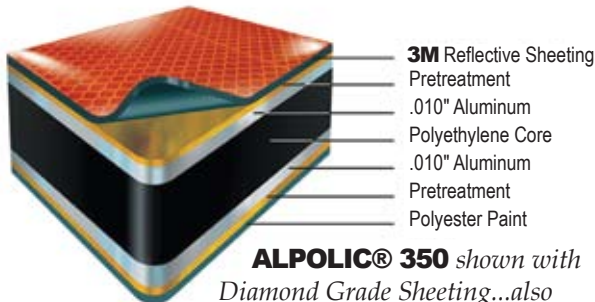

2mm **ALPOLIC® 350** covered with 3M reflective sheeting has been successfully crash tested in accordance with NCHRP 350 by Korman Signs, Inc. on a variety of sign stands. The excellent strength to weight ratio and composite construction of the material are the key factors that open up a new horizon of safety protection for work zones. Not only has the material readily passed the 350 considerations, **ALPOLIC® 350** is easy to handle and fabricate. It performs like an aluminum sign but is as convenient to use as a roll up sign...**ALPOLIC® 350** delivers the best of both worlds.

ALPOLIC® 350 is NCHRP 350 approved and can be used for any application... whether mounted on a post, directly onto Type III barricades or in a portable sign stand

Lightweight, Versatile & Dependable

ALPOLIC® 350 shown with Diamond Grade Sheeting...also available in finished signs, flat sheets or blanks

Consider these advantages:
One substrate for all applications
 Energy absorption characteristics
 Lightweight (.57 lbs./ft.)
 Accepts reflective sheeting application
 Rigidity
 Outdoor durability
 Flatness
 Ease of fabrication
 User friendly
 Reflective performance under wind load
 Storage
 Air borne velocity

ALPOLIC® 350 is manufactured by Mitsubishi Chemical America Inc., Composite Materials Division, 401 Volvo Parkway, Chesapeake, Virginia 23320. It is in stock at Korman Signs, Inc., 3029 Lincoln Ave., Richmond, Virginia 23228. For further information, call us at 800-296-6050 or visit our website at www.kormansigns.com
