

MEDIAN ADAPTERS

Model SSMAGP

1 This median adapter is designed to work in conjunction with any of our spring loaded sign stand assemblies. The base of the sign stand slides over the two uprights of the SSMAGP median adapter for a secure fit.

All median adapters feature pony clamps that provide quick set up and plenty of torque. The clamps adjust from 4" to 16" wide applications. Rubber grips grab any surface and hold securely over long periods of time.

Model SSMAUC

2 Spring loaded for wind resistance like our SSMA548, the SSMAUC holds only roll-up signs. The vertical rib is held by a Comfort-Grip soft rubber clamping knob for easy tightening & untightening.

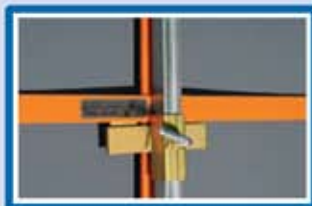

Model SSMA548

3 The versatile spring loaded SSMA548 holds either roll-up or rigid signs, up to 48"x60".

Double extension springs help deflect the wind

Built in features include brackets for rigid or roll-up signs and flag holders

MEDIAN ADAPTERS

continued

Model SSMAUCR

4 This mount holds only roll-up signs, up to 48"x60". The signs are held in place by a universal latching mechanism that secures the rib of the sign to the adapter.

A stainless steel guide plate provides a smooth clamping motion. The fiberglass cross bracing of the roll-up sign allows for the sign to flex with the wind. Rectangular and square signs use a special rib with two diagonal and one vertical cross brace.

Model SSMA2PCM

5 The 2-piece telescopic mast of the SSMA2PCM firmly holds either roll-up or rigid signs, up to 48"x60". Built-in features include brackets to hold the signs and flags. This model differs from the SSMA548 in that it has a rigid vertical mast that does not flex.
